**SWIFTER® COOLING TOWER FANS IN OVER 1000 INSTALLATIONS**

**PARSIPPANY, NJ** – Glocon Inc. has completed over one thousand cooling tower fan installations worldwide. The next generation Swifter® CTX Series industrial axial fiberglass fans are ideal for cooling towers, air cooled heat exchangers and evaporators. Fan sizes range from 5 feet to 40 feet diameter, in 4 to 16 bladed configurations. Custom fan sizes, colors and configurations are also available.

The CTX Cooling Tower Fan Series incorporates high efficiency patented airfoils and proprietary technology, in which the fan blades are molded into a single piece contiguous composite blade consisting of an outer fiberglass shell with an inner high density polyurethane foam core. The combination of the cutting-edge airfoil design and the unique molding technology results in industrial fans that provide improved efficiency, offer superior performance and exhibit high durability.
