GLOCON INTRODUCES NEW FAN SELECTION PROGRAM

PARSIPPANY, NJ – Glocon Inc. is pleased to announce the availability of its state-of-the-art Fan Selection Program for the Swifter® SW/SE Series Fiberglass Axial Fans. This web-based program provides a complete selection of our 20" – 60" dia. high performance, corrosion resistant axial fans that includes performance data, curves, dimensional and material specs as well as noise ratings, all available through an extremely easy-to-use graphical user interface.

The Swifter® SW/SE Series Fiberglass Fans are ideally suited for corrosive, humid, or outdoor applications, e.g. agriculture, condensers, evaporators, and cooling towers. Additional fan series available in larger sizes, up to 36 feet diameter.

Please visit www.swifterfans.com to access the selection program.
